

# LAB-10

## Computer Networks (ECSE208L)

Objective:

- 1) Implement Open Shortest path first protocol on the given network. For providing IP addresses to given network devices, select a class B IP address and use VLSM technique to save IP addresses.

**Note:**

- a) For submission provide the IP addressing scheme, screenshot of topology with IP addresses of devices written on them, and **PKT** file along with **DOC** file (Submit both files in a **ZIP** file).
